

Demystifying and Implementing a Cost Effective Green Purchasing Plan

A FREE Workshop

greenprocurement

Would you like to gain the knowledge and skills needed to increase competitive advantage, reduce costs, and achieve cost savings? Now more than ever, businesses need to start moving towards more green and sustainable procurement behaviours to preserve the environment for future generations.

You are invited to a workshop on demystifying and implementing a cost effective green purchasing plan!

All workshops are funded by Enterprise Connect (EC) and are complimentary.

Workshop Topics:

- What is sustainable procurement?
- How do I help my business become more efficient and sustainable?
- How do I encourage my suppliers to do the same?

Presented by Project Procure

Project Procure is a consulting firm with many years collective experience in all facets of procurement and contract management. Project Procure can assist with:

- Developing and implementing green procurement policies
- Development of green procurement targets and measures
- Conducting procurement and contract management activities
- Conducting an in-depth review of your current activities and providing recommendations
- Delivering training

Workshop Details:

Who should attend: SMEs and businesses in manufacturing, related services, clean energy, creative industries, defence, mining technology and firms operating in remote locations.

Cost: FREE

Time: 8am to 12pm

RSVP: 29th October 2010
