

ABOUT THE DINNER

The Australian freight transport and logistics industry continues to experience exciting challenges and opportunities. Governments are increasingly looking to the Australian Logistics Council for a view that reflects the depth of the freight transport and logistics industry and the efficiency of the total supply chain.

This dinner will bring together senior industry leaders to discuss infrastructure planning, investment, and regulation, as well as the broader needs of our freight transport and logistics supply chain, with a particular focus on Tasmania.

These Dinners are **invitation only events**, with a roundtable format where numbers are **strictly limited**. They are recognised for their value to industry and government, providing a unique opportunity for key decision makers in the industry to enjoy a frank discussion with the Minister.
